

REMOTE CODE EXECUTION ATTACK

CYBERCRIME & CYBERSECURITY 101

An initiative by ISSA Egypt

REMOTE CODE EXECUTION ATTACK

A flaw that lets attackers remotely run malicious code and fully control a victim's system.

ثغرة تتيح للمهاجم تشغيل كود خبيث
عن بُعد والسيطرة الكاملة على جهاز
الضحية.

DR. MOHAMED EL-GUINDY

UNODC Senior Cybercrime Expert and President of ISSA Egypt.
He is a leading authority on cybercrime, digital evidence, and
cybersecurity education.
